Product Warning Statement

May, 2006

Regardless of filter media, never spray different types of coatings into the same filter. Spraying different coating types into the same filter and mishandling used filters can result in self-ignition of the filter material.

Refer to consensus fire safety standards such as NFPA 33, local fire safety codes and coating manufacturers' product use specifications regarding proper handling and disposal of used filters. Andreae Team assumes no responsibility for damages caused by improper filter use.

When disposing of filters, place in a water-filled metal container and dispose of at the close of the day's operation or until such time that the disposal of the filters can be properly administered.

For plant and personnel protection, use and dispose of filters in accordance with NFPA 33, OSHA 1910.107, EPA regulations, and city, state or area regulatory codes.

OSHA 1926.66(b)(5)(ii)

All discarded filter pads and filter rolls shall be immediately removed to a safe, well-detached location or placed in a water-filled metal container and disposed of at the close of the day's operation unless maintained completely in water.
